

Sustainability

Reduced packaging by 67%. Saved trailer space by 60%

Add more green to your palette

We specialize in “right-sizing” packaging and displays by eliminating unnecessary layers, using lighter paper grades, and optimizing pallet/freight utilization. Our commitment to reducing paper waste means Mother Nature won’t be the only one saving green.

2017 Corporate Sustainability goals

- ⦿ Reduce greenhouse gas (GHG) emissions intensity by 10%
- ⦿ Reduce landfill waste intensity by 10%
- ⦿ Reduce water use intensity by 10%
- ⦿ Increase customer sustainable design projects by 10%

Packaging with less impact.

In the retail packaging market, sustainability goals are a top priority. Some retailers will require vendors to meet certain environmental standards before they even consider giving them a spot on the floor. We don’t think of this as a challenge but rather as an opportunity.

CaroCon makes certain that everything we make and deliver (as well as the process behind it) will meet or exceed any retailer goals.
